

New Greens Trial Tracker

Use this tracker to introduce leafy greens slowly and monitor how your rabbit responds.

[MyPetsRoutine.com](https://www.mypetsroutine.com)

Day Range	What to Do	What to Watch
First few days	Offer one familiar or mild leafy green in a small amount	Normal appetite, normal droppings, no bloating, no soft stool
After tolerance is clear	Slowly increase the amount of that green	Steady hay eating and normal litter box output
Once stable	Add a second leafy green in a small amount	Any change in stool texture, appetite, or comfort
Long term	Rotate several safe greens that your rabbit tolerates well	Consistent appetite, healthy droppings, good energy

 Name of Green	 Date Introduced	 Amount Offered	 Rabbit's Droppings	☒ Keep in Regular Rotation?
